

CAMA is a Tehran-based company that produces, imports, and exports natural stones. Its founders, with more than ten years of experience in the natural stone industry, established CAMA in 2014 with a vision to become the leader in exporting Iranian natural stones. The wide variety of products sourced locally and internationally, as well as the well-equipped factories (modern Italian machinery) and high production capacity, has enabled CAMA to become one of the pioneers in the natural stone industry.

To ensure the highest quality for our customers, we search the globe for the finest natural stones and import our products after we examine each block. Additionally, with our internal products, we directly monitor the production process of slabs sourced from supreme quality quarries across Iran.

To meet our primary goal of providing our customers with the best service, our team of experts will assist you during every step of your journey, from design and finding the right product to delivery and implementation.
