

COLLECTING BEAUTY, REALISING DREAMS. NATURAL STONE DESIGN AND PRODUCTION.

MARMI
REGINA

INTRODUCTION

We are a unique company. Almost every aspect of our business sets us apart from our competitors. The aim is to take advantage of our knowledge in the stone industry in order to create value for our customers.

We are dedicated to offering unparalleled quality, knowledge, and service, to designers, architects, fabricators and discerning homeowners while using the latest technologies.

LET'S REDEFINE THE FUTURE OF MARBLE TOGETHER

Each project is the result of a careful study of proportions, textures and colours, created with the help of cutting-edge machinery and artisanal workmanship.

Our offer includes a wide range of products, from slabs to artefacts, such as kitchen tops, coverings and floors, fireplaces and furnishing accessories. Thanks to our experience and flexibility, we are able to satisfy any request, even the most complex.

Our goal is to create unique and unforgettable spaces, where the beauty of natural stone blends with contemporary design.

OUR MISSION

IN THE HEART OF EVERY MARBLE LIES A STORY TO BE TOLD. WE ARE THE STORYTELLERS

Founded in the heart of Valpolicella in 1975, Marmi Regina boasts a long tradition in the processing of natural stone.

Since its foundation, the company has stood out for its continuous search for fine materials and for the application of innovative processing techniques, in order to offer products of the highest quality and exclusive design. Our headquarters, strategically located in the center of the Verona marble area, allows us to carefully select the best raw materials and to guarantee an efficient and controlled production chain.

Thanks to constant technological updating and a young and specialized team, we are able to create customized projects, responding to the most sophisticated needs of architects, designers and general contractors.

The Regina® brand, launched in 2015, represents our ambition to position ourselves at the top of the natural stone market, offering exclusive and customized solutions.

OUR HISTORY

EXCLUSIVE SERVICES AND UNIQUE CREATIONS

We will accompany you step by step, from the initial design to the transport and final installation, guaranteeing you an impeccable and personalized result.

1/ choice of materials and customized finishes

Our team of experts will guide you in selecting the materials and finishes best suited to your project.

MARMI
REGINA

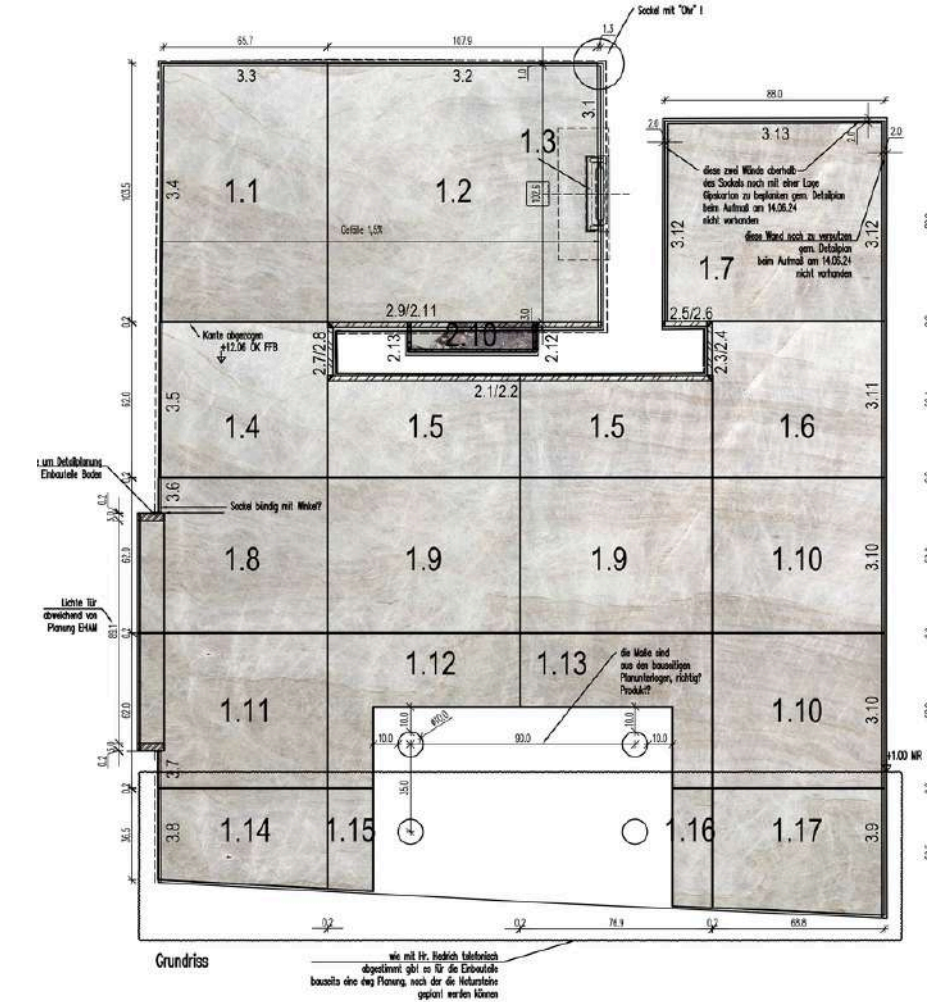

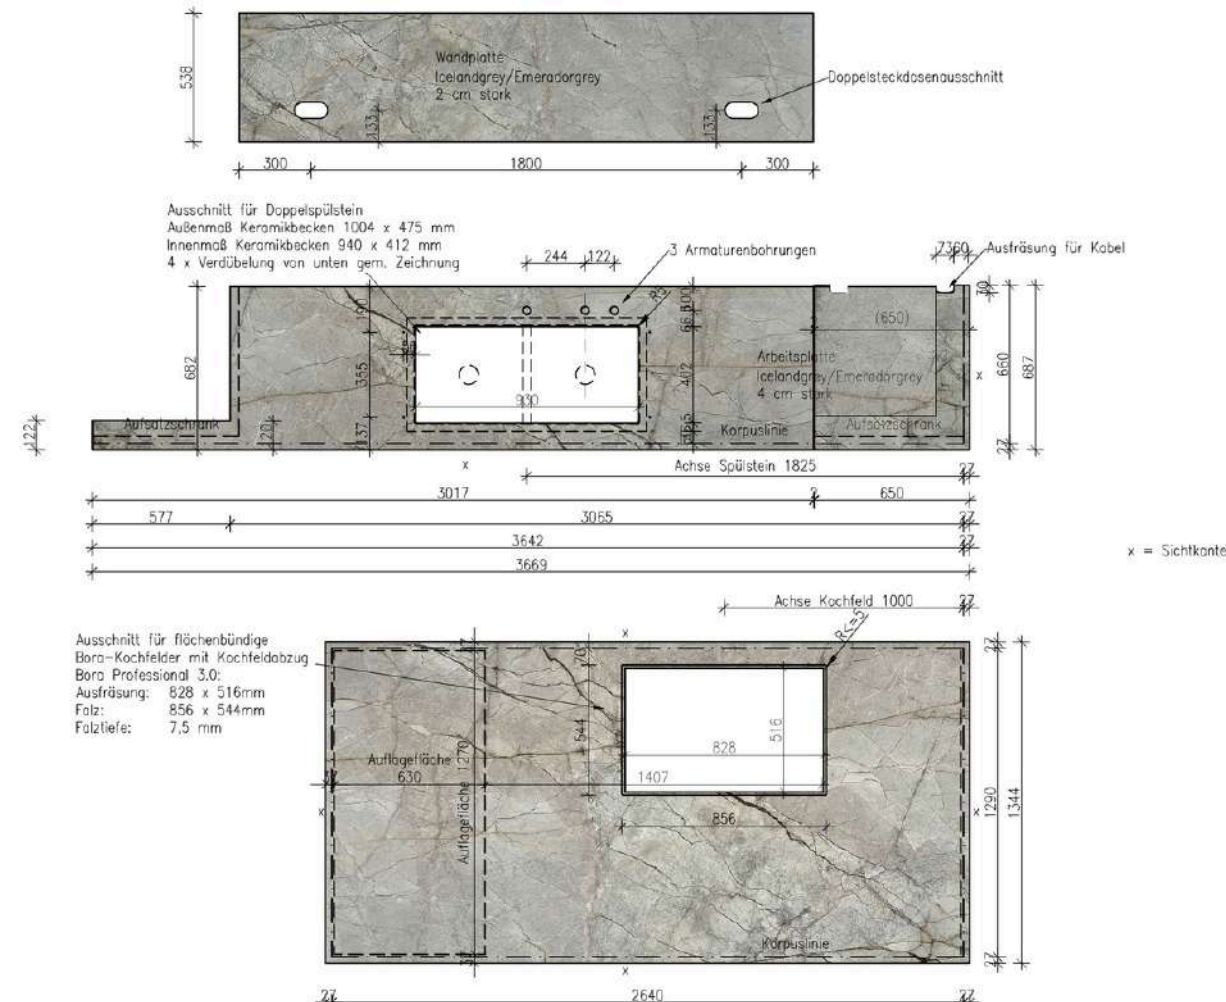

2 / Surveys, planning and design

Our team of designers, using cutting-edge CAD software and precision measuring tools for on-site surveys, is able to create customized projects, responding to the most specific needs of each customer.

We create detailed graphic designs, such as photorealistic renderings and 3D models, which allow you to preview the final result and make any changes before starting work.

3 / Internal Production: Guaranteed Quality

Our internal production allows us to control every phase of the production process, guaranteeing maximum quality and flexibility.

Our latest-generation machinery (**5-axis bridge saw, 3-axis bridge saw, cnc, waterjetand**) and artisanal workmanship come together to create unique and long-lasting products.

4 / Dry installation, Quality Control and Packaging

Each product is subjected to rigorous quality controls to ensure maximum perfection. We dry install all the panels produced to allow the customer to verify that they meet their initial needs. Once the product is completed, we take great care in the packaging and shipping phases to minimize the risk of problems or accidents.

PORTFOLIO

PROJECT 05

"Universo" collection of luxury bottle holders, designed by Luca Sempredon, stone artist, are inspired by the celestial beauty of the cosmos and made with top quality marble and natural stone spheres. Each piece in this collection pays homage to the fascinating colors and textures of the planets, with materials carefully selected for their quality and striking resemblance to the celestial bodies they represent.

MARMI
REGINA

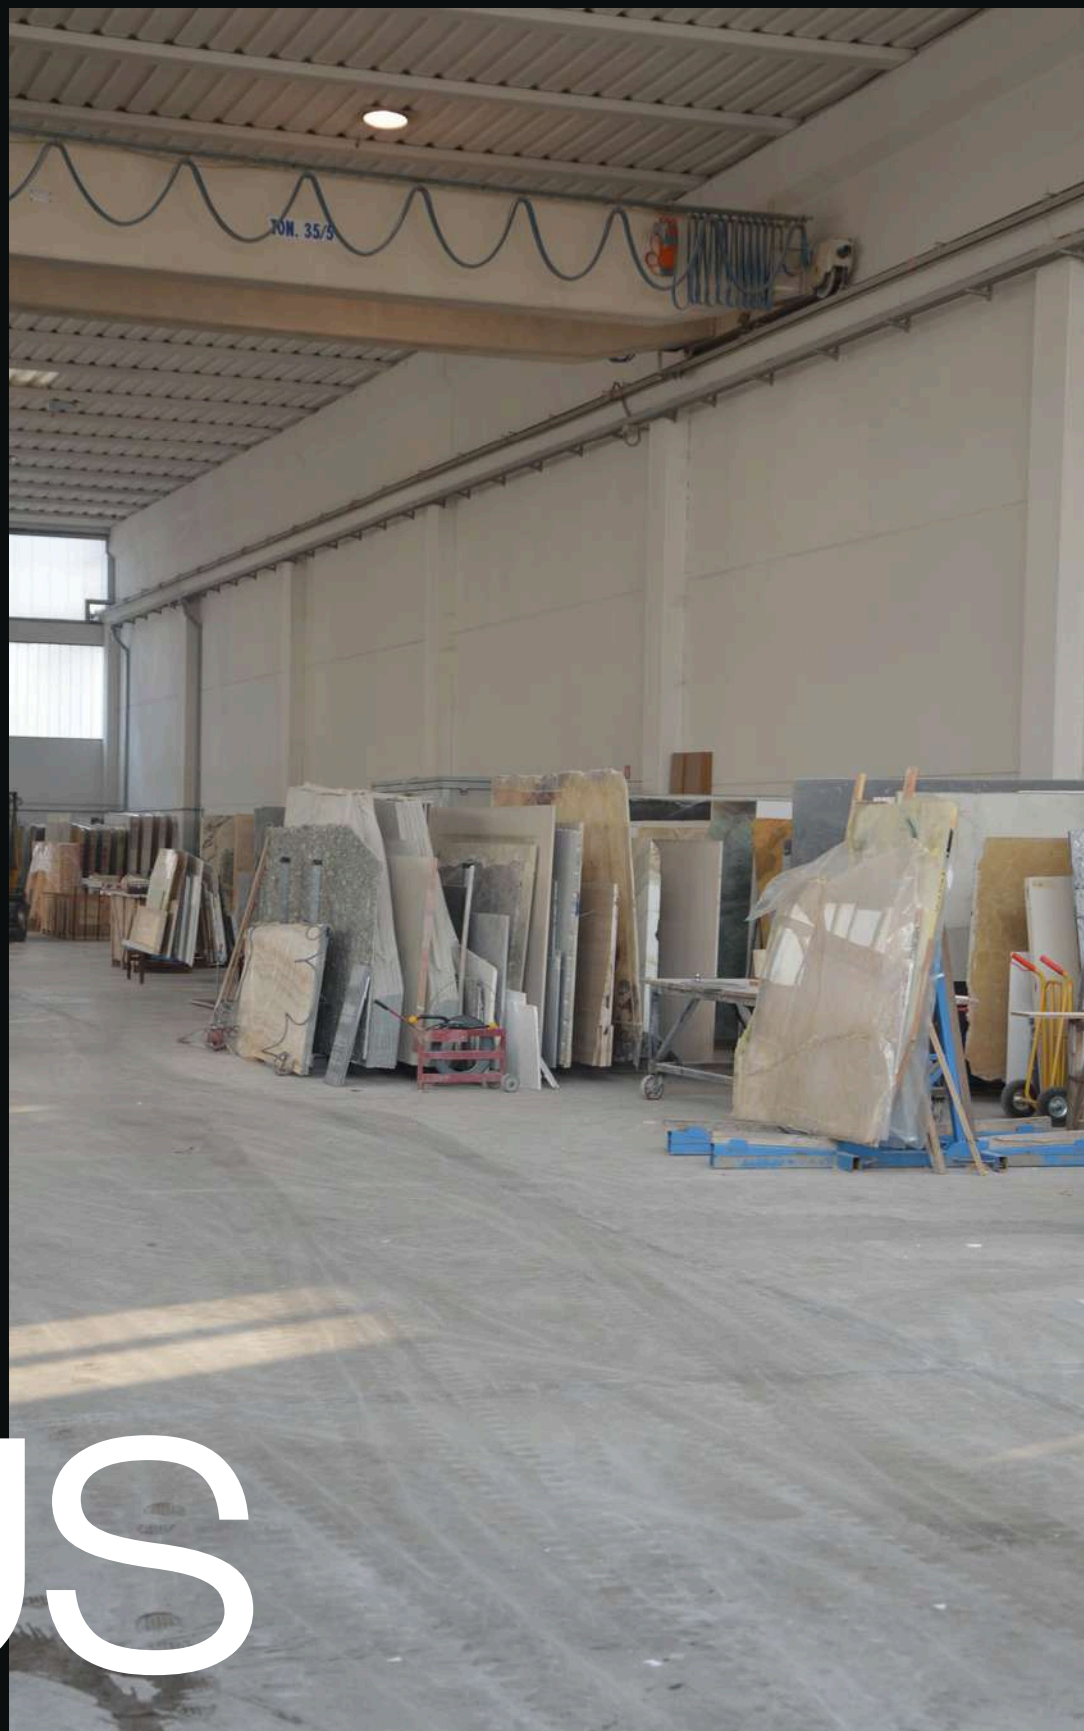

PORTFOLIO

The research project proposed by the University of Auckland team is a furniture element generated from a conceptual design created using Unity Particle System Trails. It represents a fusion of the organic with the technology of a real-time 3D digital development platform, expressed in travertine, a building material with classical antecedents.
