 Come to our stand at Marmomac 2025 and discover the timeless elegance of Greek marble.

1982. This is the year that our passion for natural stones began. Since then, our company follows a dynamic and continuous development in the field of natural stones, aiming to meet the requirements of the market and its customers.

The company operates two factories and an exhibition space, occupying a total area of 30,000 m² with a covered section of 6,000m²-main and secondary production lines- fully equipped with complete high-tech machinery processing systems.

Our company also deals with the quarry, with two quarries in the northern part of Greece. We produce an exclusive gray marble, The Assinis Gray and the gray multicolor brother The Onicciato gray Red.

This September, we invite you to join us at **Marmomac 2025**, the world's leading exhibition for the stone industry, to experience our signature collections and the unmatched quality that defines our legacy.

A Global Vision Rooted in Greek Heritage

From ancient architectural landmarks to cutting-edge contemporary designs, **Greek marble** continues to inspire awe around the world. At Marbles Manologlou, we harness this timeless material using **state-of-the-art technology**, meticulous processing, and refined aesthetic principles to serve high-end residential, commercial, and hospitality projects globally.

Whether you are an architect, designer, developer or distributor, we offer tailored solutions that meet the most demanding specifications—without ever compromising on beauty.

What to Expect at Our Stand

At **Hall 9, Stand D12**, you will be able to:

- ✓ Explore our **premium marble varieties**, carefully selected from the best Greek quarries
- ✓ See **bespoke surface finishes** and applications that redefine modern luxury
- ✓ Learn about our **cutting-edge processing techniques**
- ✓ Discuss your next project directly with our experienced team

Let us help you bring your boldest visions to life—rooted in Greek elegance, shaped by innovation.
