

About SangVareh Stone

SangVareh Stone specializes in the extraction, processing, manufacturing, and global distribution of premium natural stones. Through our own quarries and strategic partnerships with other quarry operators, we offer one of the most comprehensive selections of Iranian natural stones for projects of every scale.

We manage every stage of the production process, from selecting the finest raw materials for their beauty, durability, and performance to transforming blocks and slabs into high-quality finished products. Our integrated approach ensures consistent quality, reliability, and customer satisfaction from quarry to final installation.

Experience

With more than 40 years of combined experience in the natural stone industry, SangVareh Stone has built a strong reputation in both domestic and international markets. Our team of experienced professionals oversees every department, enabling us to establish long-term partnerships based on trust, quality, and outstanding service.

Global Export

Export is at the heart of our business. We supply natural stone products to customers across Asia, Europe, North and South America, Africa, and Australia.

Our product range includes:

- Blocks
- Slabs
- Tiles
- Custom-cut stone products

As one of the world's richest sources of natural stone varieties, Iran enables us to provide an extensive selection of materials while maintaining international quality standards, competitive pricing, and dependable delivery.

Manufacturing Facility

Since 2006, SangVareh Stone has operated its own modern stone processing facility equipped with advanced machinery and premium abrasives. Our production line is designed to deliver superior finishing quality while meeting the evolving demands of the global stone industry.

The factory combines skilled craftsmanship with modern technology to ensure precision, consistency, and flexibility for projects of any size.

Quarries

Every project begins at the quarry. Careful extraction, material classification, quality control, and technical evaluation ensure that the right stone is selected for every application.

With access to multiple quarries and substantial inventory, SangVareh Stone maintains a high production capacity and is able to respond efficiently to large-scale international projects while meeting strict delivery schedules.
