

Your digital partner for Natural Stone

Stone Sharing is the first vertical marketplace dedicated to the natural stone industry, designed to connect sellers and buyers of slabs, blocks, finished products, and marble services with just a few clicks.

In an industry worth over €4.5 billion in Italy—with more than 70% driven by exports—yet still fragmented and digitally underrepresented, Stone Sharing finally provides a specialized digital hub. It offers fast search tools, comprehensive technical specifications, direct communication without intermediaries, and dedicated management tools for businesses.

An ecosystem built to showcase Italian natural stone and turn every opportunity into modern, concrete business.
