TRAVERTINE WORLD

Welcome to the shining world of travertine and marble

It is the cradle of world civilization, Homer's homeland, Anatolia! It is where the most wonderful marble buildings of all time were created and the main source of that marble, here skilfully processed in a way which lives up to its past, is Anatolia.

The souls of Zeus, Dionysus, Aphrodite, Poseidon, Helen of Troy and Hector, who were once embodied in those statues, now come to life in Sorkun Marble's textured travertines. You will surely find the marble that perfectly suits your soul and catches the rhythm of past days, covered with beauty and creativity. Here, in the dusty quarries of western Turkey, nature's masterpieces see the light of day-every day! Precious travertine of highest quality - for your most ambitious projects. Sorkun Marble, an internationally renowned corporation, presents a wide range of products from travertine blocks to professionally produced finished goods such as wall and floor tiles, slabs, etc. Out of our own quarries and production facilities.

The high quality of the raw material, as well as our great diligence in handling this valuable natural products, ensures the satisfaction of your highest requirements. With our long experience and professionalism we are your reliable partner for your individual projects - On schedule! Unusual dimensions or ambitious deadlines are challenges we are happy to meet.

Our priority is sustainable high quality

Sorkun Marble, which started its activities in Denizli in 2002 with the awareness of preserving this magnificent historical texture and aesthetics, has an annual production capacity of 1.5 million square meters with the materials obtained from our own quarries. Since the raw materials of all the products we produce belong to our company, our products have the same quality and meet the demands of our customers in a sustainable way. The raw material extracted from the quarries is processed with great care and skill in the Sorkun Marble factory, which has a total area of 29.000 m², including 12.000 m² closed area and 17.000 m² open area
