

# Feltracco Fratelli: *Melding Craftsmanship with Innovation*

Feltracco Fratelli is renowned for its mastery in the art of creating and restoring Venetian terrazzo and pastellone, with a particular emphasis on terracotta and lime. Specialising in the historical reproduction of mosaics and the meticulous laying of floors crafted from a variety of marbles and stones processed in-house, the company is a distinguished partner on both national and international projects. Their expertise extends to a wide array of settings, including villas, historic buildings, cultural landmarks, and monumental structures of significant historical value.

Additionally, a proprietary and patented technology allows the company the production of large slabs in Venetian terrazzo, pastellone, or mosaic. These slabs can be crafted using any natural pigment and inert material, making them versatile for a range of indoor and outdoor applications. Available in various finishes, these slabs are ideal for use on floors and walls, whether in simple or complex installations, including those that are isolated or ventilated. This adaptability allows Feltracco Fratelli slabs to excel in diverse environments, even those that are particularly challenging due to the presence of aggressive pollutants, high humidity, or salts.

Feltracco Fratelli's mission has always been to honour natural materials, including those that date back to the Renaissance, by using prestigious earths and clays processed with cutting-edge systems. This dedication to blending tradition with modernity is epitomised by their exclusive dry polishing method, which incorporates immediate dust extraction, ensuring both the preservation and enhancement of the flooring's natural beauty.

In every project, Feltracco Fratelli embodies the perfect fusion of artisanal craftsmanship and innovative technology, delivering exceptional quality and timeless elegance.
