

Piedras y Mármoles Semar is a company based in Algueña, Alicante, dedicated to the extraction, processing, and commercialization of natural stone and marble. With a solid track record in the industry, we combine years of experience with a strong commitment to quality, innovation, and customer service.

We own our **own Crema Marfil quarry**, which allows us to control the entire production process from the source, ensuring top-quality materials, consistent finishes, and reliable delivery times. This competitive advantage enables us to offer tailored solutions to meet the specific needs of each client. We provide customized services for construction, decoration, and design projects, blending traditional craftsmanship with technological innovation.

Our facilities are equipped with state-of-the-art machinery and a highly qualified team, capable of handling all types of work — from tasks for marble workers to large-scale projects. We work with a wide variety of materials — such as marble, limestone, and other natural stones — and carry out everything from basic cuts to specialized finishes for interior design, architecture, and urban planning projects.

The combination of artisanal tradition and advanced technology has allowed us to position ourselves as a benchmark in the sector at the national level. At **Piedras y Mármoles Semar**, every project is an opportunity to demonstrate our passion for natural stone and our commitment to excellence.
