

○ corporate presentation

The development of connectivity

Since 1995, Euroconnection has been a key player in the evolution of the connectivity market. Founded on the vision of Michele Bardus, our history is a journey of constant growth, fueled by the value of our people and continuous investments in technology and innovation

In 2025, our CEO Kevin Bardus inaugurated the Minerbe (VR) plant, bringing our advanced production sites to three. These are the vibrant heart of our ability to respond flexibly and rapidly to market challenges.

Rigorous controls at every stage of production ensure the reliability and high performance of every Euroconnection product.

Standard cable assemblies

Euroconnection is your point of reference for connectivity solutions for servomotors and CNC. Our wide range allows us to satisfy every single market requirement, even the most specific, including hybrid cable assemblies.

B&R compatible
BECKHOFF compatible
BOSCH-REXROTH compatible
FANUC compatible
FESTO compatible
HEIDENHAIN compatible
KEB compatible
LENZE compatible
ORIENTAL MOTOR compatible

PANASONIC compatible
PARKER compatible
ROBOX compatible
ROCKWELL compatible
SANYO-DENKI compatible
SCHNEIDER compatible
SEW compatible
SIEMEN compatible
YASKAWA compatible

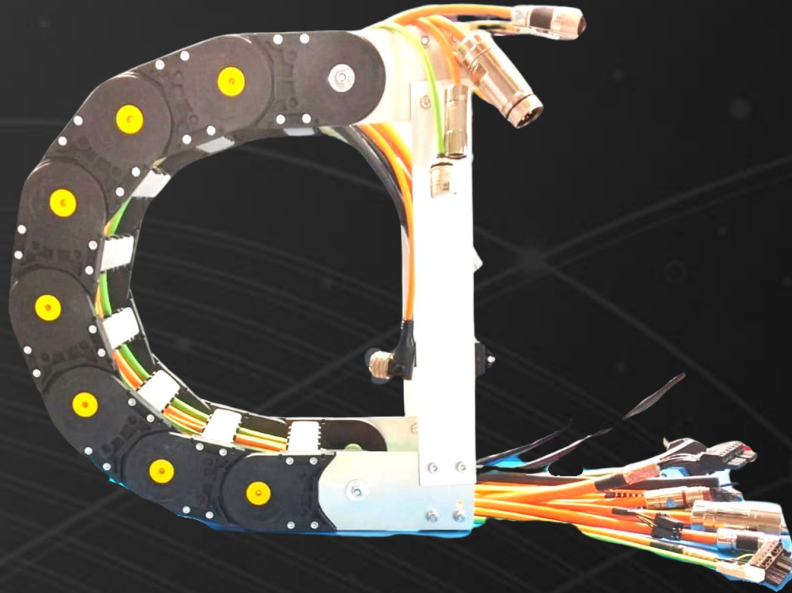

Custom cable assemblies

Together with you, thanks to co-design and solid technical expertise, we create custom cable assemblies that precisely meet your specifications. Our comprehensive offering, which also includes hybrid cable assemblies, is designed to satisfy every need, from the most standard to the most complex.

Integrated system

Integration is our core strength, Euroconnection designs and produces complete systems, from fully equipped drag chains with standard specifications or fully customized solutions to meet your every need, up to functional plug & play kits for easy system implementation.

Sensor cable assemblies

We are manufacturers of connectors and standard extension cord and we develop customized solutions to meet the specific needs of our customers.

Pre-wired connectors

Sensors/actuators
Boxes and Splitters

Connectors and
extenders for Can
Open networks

Extenders

Connectors and extenders
for Ethernet networks

Fittings

Connectors and extenders
for Profinet/Ethercat
networks

Connectors and
extenders for Sercos III

EN175301-803
connectors

7/8" Connectors
with cable

Flush type
connectors and
for PCB.

Connectors and extenders
for Profibus networks

Connectors and extenders
for Devicenet network

EN175301-803
connectors and
7/8" connectors

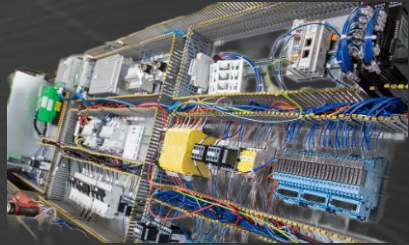

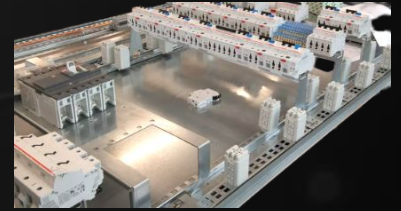

Control cabinets

We are your ideal partner for complete and customized electrical solutions, from the design and manufacturing of electrical panels for automation and power distribution (MV/LV) to the installation of electrical systems on board machines.

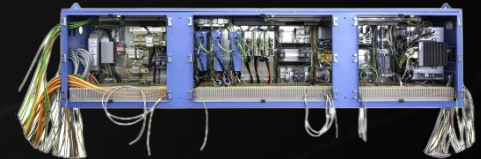

Medium-low voltage

Exclusive product

Unic8ne

UNIC8NE is the compact and robust connector that connects motors three-phase asynchronous to their command modules Connect motors asynchronous has never been so easy, simple and fast. Despite the extreme rapidity of the graft, UNIC8NE guarantees the grade protection IP67.

Services

Our expertise allows us to manage the entire cycle, from design to installation, offering an end-to-end service that guarantees the perfect integration and functionality of our products.

Warehouse 4.0

A significant investment in our warehouse, which boasts over 20,000 items, results in efficient order management and optimized delivery times for your business.

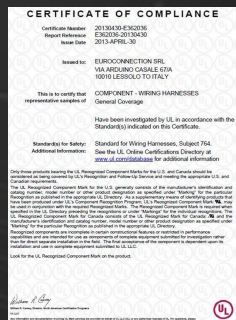

Quality and certifications

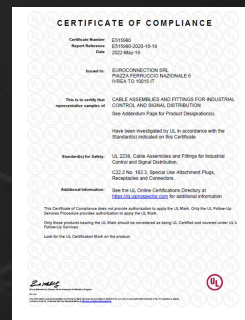

Our certifications are not just a certificate, but the tangible guarantee of our commitment to quality, reliability, and professionalism. An element that instills trust in our customers.
